

Add a Category

The quickest way to add a category is to use the **Shortcuts** menu at the top of your screen.

- Click on the drop-down menu in the top right of the screen and choose **Add new category**.

Or you can do it via the **Categories** tab in the Admin Area

- Click on the **Articles** menu
- Choose the **Categories** tab
- Click on **Add New**.

You can also add a category while you are in the middle of adding an article or a file

- Edit the article or file
- Click on the assign categories button (+)
- Click on **Add New Category**.

Once you are on the category screen you must complete the following sections:

- Add a **Title**. This is the name that will be displayed on the left menu or in any table of contents.
- Define where it fits in the category hierarchy by choosing a **Parent category** and an **Order**. If you don't change these you will add a new top-level category and it will be placed last.

You may also:

- Change how articles are displayed by specifying a category **type**
- Control read and write access through **Private** and **Active**
- **Allow** users to **comment** on or **rate** articles in the category
- Assign a person to approve articles (**Supervisor**) for the category

You can find out more about each of these fields and how they work in [the Category screen explained](#).
