

Add new status

Articles, files, users, rating comments and feedback comments all have default statuses. For example, there are four default article statuses: *published*, *pending*, *draft* and *not published*.

You don't have to stay with these statuses, you can create your own:

- From the **Tools** menu choose the **Lists** tab
- Click on **Articles** (or Files, or Users, or Rating Comments or Feedback)
- Choose **Add New**

You must include:

- A **title**. This is the status name. e.g. *In review*.

You can also add:

- A **description**, an explanation of what this status is used for.
- A **color** that is displayed with the status on article summary and list screens.
- Whether or not this status is **published**. If you check this box, then users will be able to read articles of this status. If you do not check this box, then only authors, editors, moderators and administrators can read the article.
- The **order** of this item in the status list. This defaults to *1*, which places the new status at the top of the list.
- Whether or not the status is **active**. If the status is not active, then you will not be able to assign this status to article.

Lastly

- Click **Save**.
