

Change user privilege

There are two ways to change the user's privilege.

The quickest way allows you to update the privileges of more than one user at the same time.

- Click on the **Users** menu
- Check the box to the left of the user or users you wish to change
- Choose **Set Privilege** from the **Actions with selected** drop down box

- This brings up another drop down box with a list of privileges to choose from. One of these options is to 'remove all privileges'. This sets the user back to a standard public user.
- Select the privilege you wish to change to
- Click **OK**
- You will be asked if you really want to change the privilege. Click **OK** to confirm.

The other way to change the privilege of the user is to:

- Click on the **Users** menu
- Click on the paintbrush under **Actions** to **edit** the user
- Change the **Privilege**
- Click **OK**.

This second method only allows you to change the privilege of one user at a time.
