

Customizing article display options

You can customize how and where articles are displayed in the **Settings > Public Area > Articles** tab.

Look & Feel

In this area you can specify

- **Number of articles per page** - Set how many articles appear per page. If there are more articles than the number you set, KBPublisher provides navigation so the reader can move from page to page of the display.
- **Sort articles by** - Choose an option for the default order by which articles are sorted.
- **Featured articles in a category** - Set how many "featured articles" appear for each category. Set the field to 0 to remove this feature.
- **Display 'Also listed in'** - Set to **yes** to show a list of other categories in which the article is listed. Set to **no** to disable this feature.
- **Others in this category** - Set how many links to other articles in this article's category to display when the user is reading the article. Set to "None" to disable the feature.
- **Display Prev / Next navigation** - Set whether and in what conditions you want to display previous / next navigation for articles in this article's category.
- **Category columns** - Set how many columns to use to display the articles in a category.
- **Article ID zero padding** - If you use an article title prefix (see the next field) you can set here the number of zeros with which to pad a short ID. If you set the padding number to 3, for example, and you have an article with ID 1000 ID 1 will show up as 0001 to provide a display that is easier to read.
- **Article title prefix pattern** - You can opt to prefix each article title with a pattern that can include the article's ID. For example, presume your article with ID 1 has the title "Welcome to our knowledgebase":
 - 'Q{\$entry_id}:' would cause the article to appear in the list as "Q1: Welcome to our knowledgebase".
 - 'Q{\$entry_id}:' | Q{\$entry_id} - {\$entry_type}:' would behave as above if the article does not have an entry type. If its entry type were "intro", for example, it would appear in the list as "Q1 - intro: Welcome to our knowledgebase".
- **Display Article ID** - Whether to display Article ID, last updated date at the top of an article.

Comments

In this section you can control whether and how comments display.

- **Allow add comments** - Select whether to prevent comments, to let only registered users add comments, or let all readers add comments. If you prevent comments in this field, the rest of the fields in this section are ignored.
- **Enable visual confirmation** - Specify whether to use a CAPTCHA confirmation to prevent robotic spam comments. You can require no CAPTCHA confirmation, confirmation for non-registered users, or confirmation for all users adding comments.
- **Comment approval policy** - Specify whether comments must be approved before they are added to the knowledgebase. You can accept all comments without approval, require approval only for non-registered users' comments, or require approval of all comments.
- **Comment subscription** - Specify whether registered users can request a notice to be sent when a comment is added to a particular article.
- **Number of comments per page** - Select the number of comments to appear per page. If the number of comments is larger than the number you specify here, navigation allows readers to move through the pages of comments.
- **Display comments on the article page** - Check this check box to have comments appear on the same page as the article. If this option is not selected, a link appears to a separate comments page.
- **Signature format for commenter** - Specify how the commenter's signature appears at the end of the comment. Options include [first_name], [last_name], [middle_name], [short_first_name], [short_last_name], [short_middle_name], [username], [email], [phone], [user_id]. You can use multiple tags to construct a signature, such as "[first_name] - ID [user_id]".

Rating

You can let users rate articles in your knowledgebase with these settings:

- **Allow rate articles** - Check this check box to let users rate articles.
- **Rating type** - Set the type of rating display as **stars** or **text**.

Feedback

- **Allow feedbacks** - Check this check box to let visitors to send feedback, rating comments, report an article issues, etc..
