

Final steps

You now have a simple, working knowledgebase. Now users can read your articles.

From here, you may like to:

- Experiment with different [category types](#) to see what effect each one has
- Consider adding [roles](#) to users so that you can control what individual users see
- Add items to your [glossary](#)
- If you have lots of pre-existing documentation that can't be imported as articles, why not upload them as files.

If you are an administrator, you can also fine-tune the system:

- Modify the [look and feel](#) of your knowledgebase
- Add some [templates](#) to make creating your articles easier
- Take a look at the [email templates](#) to see what's in the mails going out from and coming in to the knowledgebase
- Manage the [RSS](#) feeds
- Create your own user [privileges](#) and [roles](#)
- Set some initial [user defaults](#).
