

How to Change Your Password in KBPublisher

To change your password:

- Log in to the knowledgebase
- Click on **My account**, which is in the top right-hand corner of the knowledgebase screen
- Click **Security**
- In the **Password** area, click the **Change Password** button.
- On the page that appears, type **Your Current Password** if required.
- In the **New Password** field, type your new password.
To learn about password policy rules, click the question icon to the right of the field. You can also generate a random password by clicking the corresponding element.
- In the **Verify Password** field, retype the password.
- Click **Save** to apply the new password.

Depending on your knowledgebase settings, after you change your password, you may have to log in again by using your new password.
