

KBPublisher v3.0 release notes

Version 3.0 of KBPublisher is now available.

What's new in KBPublisher 3.0

Category role based access

- Able to make any category private so that users must log on to read
- Able to assign roles for a category so that only users with assigned roles will have access to entries in that category.

Entry role based access

- Able to make any entry private so that users must log on to read
- Able to assign roles for the entry so that only users with assigned roles will have access to these entries.

Files browsing

- Files are now browsable the same way as articles
- Files area can be used as a download area of the knowledgebase.

Search in files

- Able to search the content of files
- Support for pdf, txt and html.

User roles

- User roles allow you to set up role based access, or you can use it just to organize users
- Roles are organized as a tree.

User privileges

- You can now create as many user privileges as you want.

User/member module rewritten

- Now any user can have access to both the Public area and Admin area (if they have appropriate privileges), no more double login required.

Category display type

- Three category display types. Browsable (default), Book or Quick FAQ
- Book - ideal for user manuals, etc.
- Quick FAQ - all articles displayed in one page. Ideal for FAQ sections of the knowledgebase.

Different menu type

- No menu
- Left Tree menu
- Left "FollowOn" menu

Article type

- Able to create and assign type for articles. Any type can have its own template
- Able to display article type on public site with article title. e.g. 123 - INFO: Article title

Article templates

- Customizable article templates.

Update article link

- A link in the public area to update the article if the user has privileges
- Full and Quick update modes.

Remote authentication / LDAP authentication

- Able to integrate your organization's authentication system with KBPublisher.

Plus

- Article approval flow
- File approval flow
- User approval flow
- User companies
- Search by article ID in public area
- More filter options in articles Admin Area
- Editable article statuses
- Editable file statuses
- Editable user statuses

- Editable Feedback subjects

And

- Code optimization for faster response times.
