KBPublisher v3.0.1 release notes

KBPublisher release 3.0.1 fixed several issues found in KBPublisher Release 3.0 and added some new features.

Enhancements:

- "Date_posted" is no longer a required field when importing articles
- Glossary entries are now sorted alphabetically in the Public Area
- Curly braces ({}) are not stripped in articles
- Article Author and Updater displayed in form view (edit) and in list view as tool-tip
- Extra actions added in article categories "Bulk Actions" - Set Supervisor, Allow/Disallow Comments and Rating
- Zero-padding for article IDs in article title prefix
- FCKeditor upgraded to v2.6.3 (August 5, 2008)

Fixes:

- Fixed problem where "Quick Edit" did not work if the public area was a secure connection (https)
- Fixed issue when "updater_id" for article was not changed in "Quick Edit" mode
- Fixed issue where some pages in "Settings" menu did not work in Safari on Mac OS
- Fixed issue with incorrect caching for RSS when using Internet Explorer
- Fixed issue where mod_rewrite worked incorrectly on some servers
- Fixed issue of extra space being added to external links
- Fixed issue where glossary definition was empty in Internet Explorer
- Fixed issue where "Get Files" in Files->Bulk Actions returned files ignoring user input in IE
- Fixed issue where comments that include single quotes (') raised a database error

Upgrading from v3.0 to v3.0.1

This package is available as both a standard upgrade and as a Modified Files package. Please read here for upgrading instructions.
