KBPublisher v8.0.1 release notes

KBPublisher release 8.0.1 fixed several issues found in release 8.0

- Fixed an issue with wrong date updated and updater when exporting from the admin area.
- Fixed an issue with incorrect export if a PDF file is embedded in an articl.
- Added a log of the last pdf export execution, see file /.../kb_cache/last_export_pdf.log
- Added text indexing for .pptx and .odt files

Upgrading KBPublisher

This package is available as both a standard upgrade and as a Modified Files package.
All downloads are available in your client area.

- To upgrade from **v8.0 to 8.0.1**, you can use the "Modified Files package." Please read about how to replace modified files only.
- To upgrade from an earlier version, please read Upgrading KBPublisher.
