

KBPublisher v8.0.3 release notes

KBPublisher release 8.0.3 fixed several issues found in release 8.0.2

- The "Disable MFA" action has been changed to POST with token verification.
- Fixed a potential Reflected-XSS issue on user account pages.
- Fixed an issue with "Quick Answer" when Sphinx search is enabled.
- Improved the look and feel for "Quick Answer".

Upgrading KBPublisher

This package is available as both a standard upgrade and as a Modified Files package.

All downloads are available in your [client area](#).

- To upgrade from **v8.0.2 to 8.0.3**, use the "Modified Files package." Please read about how to [replace modified files only](#).
- To upgrade from an earlier version, please read [Upgrading KBPublisher](#).
