

# Manage Automations

To access your automations, select **Tools** from the menu bar. Then select the **Automations** sub-tab:

The tab displays both your active and inactive automations for either articles or files. Switch between the **Articles** and **Files** tabs to see all existing automations. If the list is long, enter a keyword in the **Filter** field to display just the automations that have that keyword in their titles. To restore the full list, remove all text from the **Filter** field.

For each automation, you can click the button in the **Action** column and select an action to perform:

- **Change status** - Select to change the status of the automation from active to inactive, or from inactive to active. A confirmation message appears to make sure you want to change this status.
- **Duplicate** - Make a copy of the automation that you can then edit. This helps you quickly create automations that are similar to existing ones.
- **Edit** - Edit the automation. See [Creating or editing an automation](#).
- **Delete** - Select to delete the automation. A confirmation message appears to confirm you want to do this.

## Add an Automation

To create a new automation, click **Add new**. See [Creating or editing an automation](#).

## Reorder

To change the display and execution order of the automations:

- Click the button with three dots [...] in the top right corner.
- Choose Reorder from the popup menu.
- Rearrange the articles by dragging and dropping them in the results list.
- Click Save.
