## Comments

SaComments allow readers to give feedback on articles.

You can read comments in the public view, or if you have admin access you can also see them from the comments tab in the knowledgebase.

To add a comment:

- Open the article to read it
- On the right click on **More** icon in the float panel on the right.
- This brings up the screen to choose an action. Click on the Add Comment icon.
- This brings up the screen to add a comment. Type in your comment. Type it in as plain text. Do not include HTML.
- If you wish to be notified when someone else adds a comment to this article, check Subscribe
- Unless the system administrator has changed the settings, you will then need to type in a confirmation code. Type the code exactly as you see it. Match upper and lower case.
- Click Send.

Your comment is displayed beneath the article.

By default, it is displayed immediately, but this can be changed in the settings to require approval first.

## **Rating Comments**

Users can rate articles to say whether they were helpful or not helpful.

Depending on how you set your knowledgebase up, they can either rate an article as:

- Helpful/Not helfpul, or
- Use a star rating system.

When a user rates an article they can also add a comment saying why they rated the article the way they did.

These comments are emailed to the supervisor for that category, or if no supervisor is assigned, to the system administrator.

You can see these rating comments in the Admin area

- Choose the Feedback menu
- Select the Rating Comments tab
