Reports

Reports functionality in KBPublisher

The screenshot shows the 'Reports' interface with the 'Usage' tab selected. On the left, the 'Report Filter' panel (1) lists various metrics: Article Views, File Downloads, News Views, Logins, Registrations, Comments, Feedback, New Articles, New Files, Updated Articles, and Updated Files. The 'Range' is set to 'Daily' (2) and the 'Period' is 'This Month' (3). An 'OK' button (4) is at the bottom of the filter panel. The 'Chart Type' section (5) has 'Line' selected. The main area displays a line chart showing data for Article Views, File Downloads, Logins, and Comments from July 1st to July 31st, 2019. A data table (6) is shown below the chart, and an 'Export' button (7) is in the top right corner.

Date	Article Views	File Downloads	Logins	Comments
01 Jul, 2019	2	0	1	0
02 Jul, 2019	3	0	1	0
03 Jul, 2019	2	0	2	0
04 Jul, 2019	1	0	1	0
05 Jul, 2019	1	0	0	0

1. **Report Filter** allows you to choose which statistics you want to report on. Check each item you want statistics for
2. **Range** allows you to determine whether the stats are shown for each day, for a month at a time or for a whole year.
3. **Period** is the time period over which the stats are to be listed for. The options here depend on what you choose in the range. For example, if you choose monthly, then the period options will be this week, previous week, this month or the previous month. You can also select a custom period. If you choose this KBPublisher allows you to choose a From date and a To date.
4. Once you have selected filters, a range and a time period, click the **OK** button to produce the report.
5. The report is displayed as a graph - you can choose line, bar or pie charts
6. And as a table on screen.
7. If you wish, you can also **Export** the results.

The 'Export' dialog box shows three radio button options: XML (selected), CSV, and Excel. There are 'Export' and 'Close' buttons at the bottom.

If you click on the **Export** button, you get the option to export the results in XML, CSV or Excel format. Once you have chosen the appropriate format to export in, click on the **Export** button to export the data. You will be asked if you want to open the file or save it.

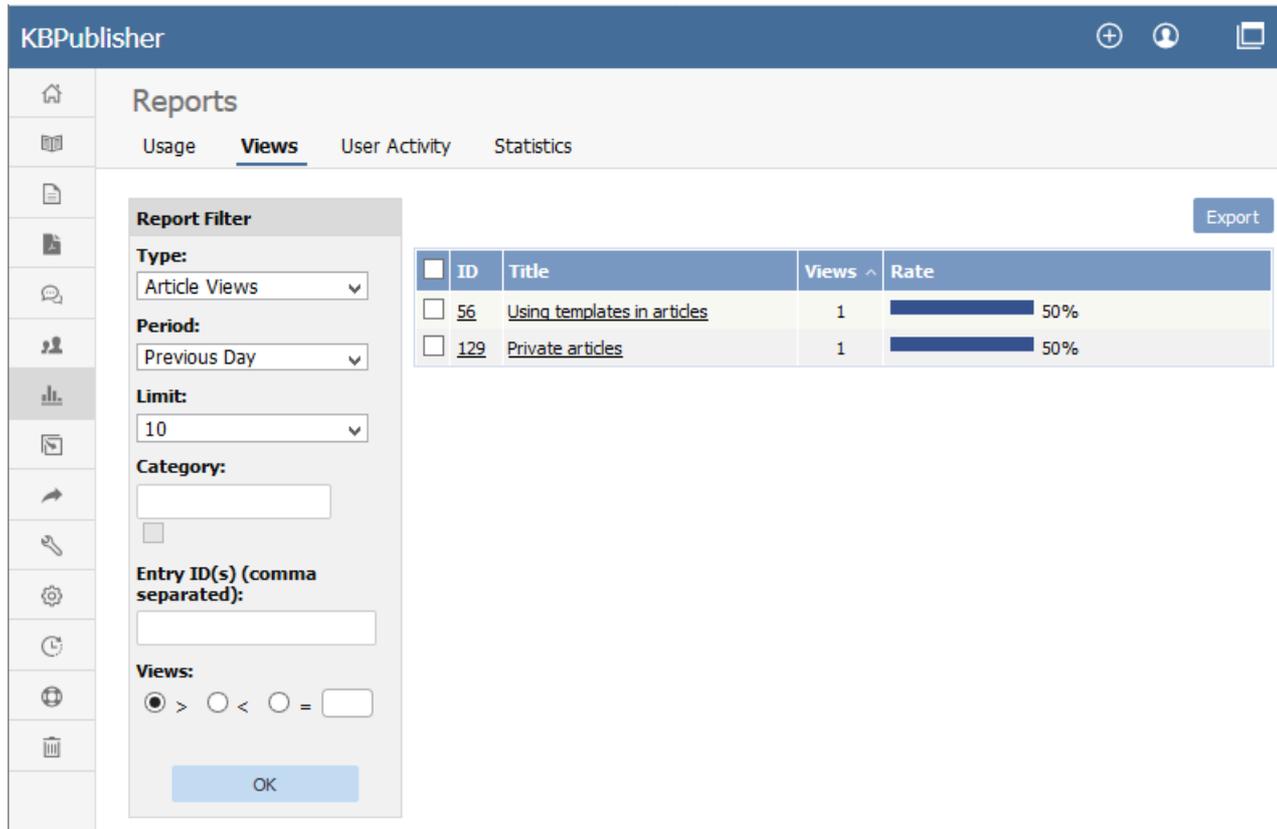

Note:

- Report functionality only works when [scheduled tasks are turned on](#)
- Data collected is summary data. We do not break down data to individual user level, we collect totals only.

This functionality works in version 3.5 and above

The Views Report Explained

The Views Report lets you review how often visitors are looking at each of your articles or documents.

The main display shows you, for each document:

- the document's ID
- the title
- the number of views (or "hits") the document has had in the current time span
- what percentage of all views that number represents (in the "Rate" column)

If there are a lot of entries, the list at the right is broken up into pages, with the number of entries displayed at the top left. Use the navigation options at the top right to move through the list.

You can **filter** the display to simplify finding what you want. The **Report Filter** is on the left of the screen, and you can use one or all of these filter conditions:

- **Type** -- Choose from the available options: Article Views, File Downloads, or News Views.
- **Period** -- Choose a time period such as "This Week". If you choose "Custom", fields appear where you specify the start and end dates for the custom period.
- **Limit** -- Indicate how many entries to display. If you select "_", KBPublisher displays all entries for the type you selected.
- **Category** -- Choose a category to only display items from that category. Check the checkbox to the right of the field to also display entries in sub-categories of the category you selected.
- **Entry ID** -- You can enter one or more document IDs, if you know them, to restrict the display to those documents only. If you enter multiple IDs, separate them with commas (like "22, 40, 104, 10021").

Click **OK** to display filtered search results. If there are no results, your search may be too restrictive: remove or relax one filter and click **OK** again.

To see **details** about one document use, you can click its title.

The **Details** appears. This view has a space for a chart at the top, a table and an export button.

Details View

The details view can display a chart of document use, and has a table to report on daily use and a button to export the information.

Chart

A chart of document views can help you analyze viewing and use patterns over time. You can display the information about the selected document or documents as a **Line**, **Bar**, or **Pie** chart; or you can opt to have **no chart**:

Table

The table shows the number of views for the selected document for each day in the selected period. Sundays appear in red so you can quickly see week-by-week information.

Export button

You can export the views data for the documents you selected. See [Export Reports](#).

To return to the full list of documents, locate the "breadcrumbs" entry at the top of the display. Click either **Article Views** or **Filtered views** to close the details view.

Note: Report functionality only works when scheduled tasks are turned on

The User Activity Report Explained

The User Activity Report lets you view activity on your site so that you can analyze your user base and the state of your content. You can find actions performed by specific users, actions related to specific articles or other types of content, and can even filter your search by date range or IP address.

Note: Report functionality only works when [scheduled tasks are turned on](#).

What reports I can generate?

The User Activity report is very flexible. Here are a few examples of what you can find:

- users who logged in this week
- users who did not log in this week (use the "Invert Result" checkbox)
- articles that were updated last week
- articles that were created this month
- articles that were created this month by specific user
- all of a specific user's actions
- all actions by a user with a specific IP address

What report data is available?

For every entry type, the system logs different actions. The "Actions" dropdown menu in the filter report varies by entry type. For example, the "Publish" action is only available when the entry type is Article Draft or File Draft. As a more extended example, for the User entry type the system logs the following:

- **Create** - Someone created a user
- **Update** - Someone updated a user's details
- **Bulk Update** - Someone updated user details in bulk
- **Delete** - Someone deleted a user
- **Login** - Someone logged in

What are the report filter options?

The Report filter is on the left of the screen, and you can use one or all of these filter conditions:

- **Entry type** - Choose from the available options: (*all*), Article, File, User, News, Article Draft, File Draft.
- **Action** - Choose from the available options: (*all*), View, Create, Update, Bulk Update, Delete, Move to Trash, Login, Publish.
- **Period** - Choose from the available options: All, Previous Day, This Week, Previous Week, This Month, Previous Month, This

Year, Previous Year, Custom period.

- **User ID** - Enter the numerical ID for a user, or click the + button to select a user from the Users popup. For results already displayed, you can also click on a user's name in the User column and select **Report filter**.
- **Entry ID** - Enter the numerical ID for the entry type, or click the + button to select an entry from the popup.
- **User IP** - Enter an IP address to filter by user IP.
- **Invert Result** - This checkbox extends the report's powerful functionality by displaying the inverse of the results that the currently selected filters would display. For example, you might search for users who have *not* logged in since the middle of last month, or you might want to know which articles have *not* been updated this year.

How are the results displayed?

If there are a lot of entries, the list at the right is broken up into pages, with the number of entries displayed at the top left. Use the navigation options at the top right to move through the list.

The main display shows the following for each activity log item:

- the time
- the entry type
- the action
- the entry ID
- the user's last name and first initial
- the user's IP address

Can I export this report data?

Yes! See our article about [exporting reports](#) for more information.

Export Reports

You can export your reports on document and file activity from the **Usage, Views** and **User Activity** tabs of the **Reports** menu item.

Each of these tabs has a pair of sub-tabs, **Report** and **Export**. Once you see the information you want to export in the **Report** sub-tab, switch to the **Export** sub-tab to export it.

For **XML** or **Excel**, select that option and click **Export**.

For **CSV** export, accept the defaults for the options for the exported data, or set your own:

- **Fields terminated by** -- The mark that indicates the end of data for the current field; normally a comma.
- **Fields optionally enclosed by** -- You can opt to enclose data for each field in quotation marks or another mark. This allows you to include commas in the data even if they are also used as the field terminators.
- **Lines terminated by** -- For multi-line entries for a field, the mark that indicates when to start a new line,
- **Include field names row** -- Check the checkbox to include the header row in the export.
- **Include total row** -- Check the checkbox to include a "totals" row indicating a count of the entries.

When you are satisfied with the settings, click **Export**.

This functionality works in version 3.5 and above

The statistics screen allows you to see

- What are the most viewed articles
- The articles with the highest rating
- The articles with the lowest ratings
- The articles with the most comments
- The most downloaded files
- The most popular search terms used, and the least popular
- Plus general statistics about articles, files, news, feedback and users.

You can export the results as xml or csv files for use elsewhere.

Note:

- We keep records at summary level only. We do not break data down into individual users.

This functionality works in version 4.0 and above

The Must Read Report Explained

The **Must Read Report** lets you review which articles are set as required reading, who has confirmed reading them and when, and who has not confirmed reading.

You can **filter** the display to simplify finding what you want. The **Report Filter** is on the left of the screen, and you can use one or all of these filter conditions:

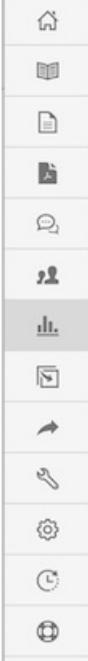

- **Entry Type** -- Choose from the available options: Article or News.
- **Date Created** -- Choose a time period when the Must Read was created, such as "This Week". If you choose "Custom", fields appear where you specify the start and end dates for the custom period.
- **Date Expired** -- Choose a time period when the Must Read expires. If you choose "Custom", fields appear where you specify the start and end dates for the custom period.
- **Notified** -- Filter result by Notified status.
- **Confirmed** -- Filter result by Confirmed status.
- **User ID** -- You can enter one or more user IDs, if you know them, to restrict the display to those users only. If you enter multiple IDs, separate them with commas (like "22, 40, 104, 10021").
- **Entry ID** -- You can enter one or more document IDs, if you know them, to restrict the display to those documents only. If you enter multiple IDs, separate them with commas (like "22, 40, 104, 10021").

Click **Filter** to display filtered search results. If there are no results, your search may be too restrictive: remove or relax one filter and click **Filter** again.

To see **details** about one Must Read use, choose **Details** from popup menu on the right.

Details View

The details view displays detailed information about Must Read items, such as Must Read details, and a list of users along with dates when they were notified and when they confirmed.
