

Retrieving News

All API URLs listed here must be prefixed by the root API URL.

Example: <http://domain.com/kb/> or <https://kb.domain.com/>

Retrieve News Entry

GET [api.php?call=news&id=\[id\]](#)

Arguments:

- **skip_hit** (optional) - Do not count entry hit. If this argument is omitted, it defaults to 0.
- **img_rpath** (optional) - Use relative path for images in article body instead of absolute path. If this argument is omitted, it defaults to 0.

News List

GET [api.php?call=news](#)

Arguments:

- **year** (optional) - Year when news posted. News posted in year equal to this value will be returned. The year should be in format YYYY.
- **method** (optional) - Specifies method. If specified, **sort** and **page** argument will be ignored.
Valid values include:
 - recent (recent news will be returned).
- **limit** (optional) - Number of news entries to return per page. If this argument is omitted, it defaults to 10. The maximum allowed value is 100.
- **page** (optional) - The page number of results to return. If this argument is omitted, it defaults to 1.
