

Search in custom fields

You can search for data in both the [Public Area](#) and in the [Admin Area](#).

To search in the Public Area

- Click on **Advanced Search**
- Select a type (**Article** or **Files**)
- Click **Extra Options** section which contains all the custom fields

The screenshot shows the KBPublisher interface with the 'Advanced search' section. At the top, there are navigation tabs: Knowledgebase, News, Downloads, Glossary, Ask a Question, Tags, and Site Map. Below these is a breadcrumb trail: KB Home / Advanced search. A search input field is present with a search icon and a help icon. The search criteria are organized into three columns: Type, Find results, and Last Updated. The 'Type' column has radio buttons for All Content, Articles (selected), Files, and News. The 'Find results' column has radio buttons for Everywhere (title, body, tags, ...) (selected), In titles only, In keywords/tags, and By entry ID. The 'Last Updated' column has radio buttons for Any (selected), Last 10 days, Last 30 days, Last year, and Custom period. Below these columns are three sections: Category (with an edit icon), Article type (with an edit icon), and Department (with a dropdown menu).

To search in the Admin Area

- Click on **Articles** (if field is under Articles, or Files, News or Feedback if field is under, respectively, files, news or feedback)
- Click on the [+] button to the left of the search area

The screenshot shows the KBPublisher Admin Area search interface for 'Articles'. The top navigation bar includes 'Articles', Drafts, Featured, Comments, Feedbacks, Glossary, Categories, and Template. Below this is a search area with filters for Category, Status, Type, and Search. A red '3' indicates the number of results. A 'Department' dropdown is also present. A 'Search' button is located below the filters. At the bottom, there is a pagination bar showing 'Records: 1 - 10 of 143', 'Pages: 1 of 15', and 'Records per page: 10'. Below the pagination is a table of search results.

ID	Posted	Updated	Title	Category	Rating	Views	Status	...
62	03 Nov, 2007	14 Sep, 2016	The category input screen explained	Comments	★★★★☆	43088	Active	...
487	09 Jun, 2019		Adding Code Snippets	New Category	★★★★★	6	Active	...

This brings up a list of all custom fields for articles (or files/news/feedback)

The list of custom fields display by default is custom fields that are included in all categories. If you want custom fields that are listed only in a specific category, select the category

Once you have your list of custom fields

- If necessary, choose a **category**.
Categories default to 'all' and will also search in sub-categories if you use the default options
- Choose which field you wish to search on, and choose which data you wish to search for
 - If the field is a multi-choice field you will be presented with a list of drop-down values to select from
 - If the field is a checkbox, you will be able to check the value to choose items with that flag set
 - If the field is a text field, you will be able to type text into the field to search on

and so on.

- Click **Search** to start the search.

This brings up a list of all articles with that particular custom field value.

Some working examples for search

Let's say you have a knowledgebase set up as follows:

Article	Category	Custom field	Valid values for custom field	Custom field defined at category level	Value in custom field
Teach yourself Photoshop	Product	Extras	DVD T-shirt Game	No	DVD
Nerds Rule	Product	Extras	DVD T-shirt Game	No	T-shirt
How to Make Cards	Product	Extras	DVD T-shirt Game	No	-
Our London Office	Branches	Retail shop	Yes No	Yes	Yes
Our Paris Office	Branches	Retail shop	Yes No	Yes	Yes
		Extras	DVD T-shirt Game	No	T-shirt

No valid value has been set for the article *How to make cards*. Also, *Extras* can be defined anywhere.

- If you click on search without defining any further parameters this brings back a list of all articles which contain values in any custom field, hence it would return:
 - *Teach Yourself Photoshop*
 - *Nerds Rule*
 - *Our London Office*
 - *Our Paris Office*
- If you select *T-shirt* in the *Extras* custom field, and then click on search (still not having defined any further parameters, or using *All*), this will bring back:
 - *Nerds Rule*
 - *Our Paris Office*
- If you select *T-shirt* in the *Extras* custom field, and choose the *Product* category, this will bring back:
 - *Nerds Rule*
- If you choose *T-shirt* in the *Extras* custom field, and *Yes* in the *Retail Shop* field, and search all levels, then your search will return:
 - *Nerds Rule*
 - *Our London Office*
 - *Our Paris Office*

This last is because it will search for either field, rather than both fields.
